

This document contains the descriptions of the data model of a Simple Project Management App created in the context of a UI design assignment in the Web 3 course.

### Data Model

The app uses three tables. You must create these three tables in your own database. You must use exactly the names shown in this documentation because the code I provide uses these names.

PMUsers		
ID	int(11)	AI
User	varchar(255)	
Pass	varchar(255)	
TCreated	timestamp	CURRENT_TIMESTAMP

PMProjects		
ID	int(11)	AI
UserID	int(11)	PMUsers.ID
Title	varchar(255)	
Description	text	
Archived	bit(1)	0
TCreated	timestamp	CURRENT_TIMESTAMP
TArchived	timestamp	

PMTasks		
ID	int(11)	AI
ProjectID	int(11)	PMProjects.ID
Description	text	
Deadline	date	
Completed	bit(1)	0
TCreated	timestamp	CURRENT_TIMESTAMP
TCompleted	timestamp
